

## Monasterevin Lifting Bridge in Ireland

This bridge was completely refurbished in 2010, and the bridge structure and also the railing and stanchions were coated with the same system:

Zinga: 1 x 80  
Alufer N: 1 x 30 + 1 x 100  
PU (Dupont) 1 x 60

The location of the bridge is within a C3 / C4 atmosphere.
